TO THE READER

Florida can be conceived of as a system--complex, inter-related but open. This system comprises individuals, households, farms, business enterprises, governmental agencies, and associations of all kinds--cultural, political, recreational, religious, and social. These individuals and organizations may work independently, competitively, or cooperatively to sustain and improve the lives and livelihoods of Floridians.

The purposes of the Florida Statistical Abstract are to:

--describe the manifold dimensions of the Florida system in quantitative terms,

--measure the changes that have taken place over time,

--compare the economic and social attainments of sub-areas within the state: cities, counties, and metropolitan areas,

--indicate the relationship of Florida's activities to those in other states and in the nation as a whole.

Every effort is made to obtain and publish in the Abstract the most up-to-date information possible. However, because these data have been collected by many entities--state and federal, private and public--they may cover activities occurring in different periods of time. It is impossible to insure uniformity, but time periods are always stated in the tables.

When the statistics on some subject have not been updated at the time an edition of the Abstract is ready to go to press, they may not be repeated. The user is encouraged to utilize data in earlier editions. This is particularly true for census data. A new feature in this edition is an index of census tables appearing in previous editions.

The first part of the Abstract includes those tables that present information about the characteristics of the population: number of people, housing, health, education, income, employment, and welfare. The next three parts refer to establishments engaged in economic, social, and political activities.

Sections 9.00 through 23.00 present information about establishments rather than individuals. These establishments are classified by the type of activity in which they are engaged according to the Standard Industrial Classification (SIC). This system has been developed by the U.S. Office of Management and Budget and is published in the Standard Industrial Classification Manual, 1972. The Manual defines an establishment as "an economic unit generally at a single physical location where business is conducted, or where services or industrial operations are performed." An establishment is not necessarily identical with an enterprise or company which may consist of more than one establishment. Both profit making and not-for-profit organizations are included as well as agencies of the federal, state, and local governments. Major industries are assigned two digit SIC codes: 20 through 99; subdivisions are classified by three- and four-digit codes.

For example, the construction industry is divided into the major group, SIC 15, "building construction"; group SIC 16, "construction other than building construction"; and group SIC 17, "special trade contractors." Group 15 is in turn divided into group 152--"general building contractors, residential buildings," group 153--"operative builders," and 154--"general building contractors, non-residential." Finally, group 152 is subdivided into 1521--"general contractors, single family houses," and 1522--"general contractors, other than single-family."

The last section of the Florida Statistical Abstract contains exhibits of a comparative nature: economic and social trends. In Section 24.00 are a number of

time series showing the fluctuations of such major economic activities as income, prices, and employment. Measures of the quality of life in the state and metropolitan areas are given in Section 25.00.

Fiscal years. In 1976 the federal fiscal year was changed to extend from October 1 of one year through September 30 of the next. The fiscal year of the State of Florida is July 1 of one year through June 30 of the next. In a few cases where a reporting organization, particularly one of the Florida cities, has a different fiscal year, the months included are stated in the table.

Covered employment and payroll. A number of tables are composed of statistics relating to employment and payroll covered by the unemployment compensation law of Florida and the federal government. These data are supplied in unpublished form by the Bureau of Research and Analysis, Division of Employment Security, Department of Labor and Employment Security, State of Florida. Readers should keep in mind that some types of employees are not covered by the unemployment compensation law. An explanation of the limitations of these data is to be found in the introduction to Section 6.00.

Computer printouts of Abstract information. All tables in the Florida Statistical Abstract are on computer tapes; reproduction has been accomplished by computer activation of a composing machine. Computing was done utilizing the facilities of the Northeast Regional Data Center of the State University System of Florida, located on the campus of the University of Florida in Gainesville.

Additional information. The sources of data are listed at the bottom of each table. Suggestions for locating sources or obtaining more information are made in "Guide to Sources of Statistics" at the end of the book.

The preparation of this edition of the Abstract was shared by many members of the staff of the Bureau of Economic and Business Research. Frances Terhune served as managing editor and directed the collection of data sources. Susan Floyd coordinated staff activities and supervised the page layouts. Denise Witte was responsible for the required statistical computations and for coding and auditing the data. They were assisted by statistical aide Jerri Norris, student assistants Kathleen Bragan, Peter Covino, Michael D'Ambrosio, Thomas DeGroot, Judy French, Debbie Halecky, Jody Hood, Janet Palmer, Dean Richstone, Lisa Tosi, Truc Tran, William Wells, and Roy Willis, and graduate student Jan Trifts. Graduate students Bruce Kuhlman and Hazel Robinson participated in the search for and compilation of data; Harold Smith, Susan Floyd, and Frances Terhune indexed the tables. Janet Fletcher, Barbara Jacobson, Pam Middleton, and Kathy Butts provided clerical assistance. Evan Eldridge supervised data processing and created the computer maps. Leo Wierzbowski was responsible for computer programming; Genevieve Floyd was the data processing coordinator, assisted by Maria Arevalo, Jim Delaune, Elizabeth Latimer, Julie Logsdon, Donald Morrison, and Parker Painter. Nellie Widener supervised the keypunching of the data, assisted by Phyllis Lee and George Matthews. Dorothy Evans prepared almost one-half of the tables, the chapter introductions, and the index on the word processor. Kim Weeks prepared the maps and cover. Ann Pierce, Charles Morrison, and Kathy Donahue provided editorial consultation and assistance. The staff of the University Presses of Florida provided production assistance and handles distribution.

We would be happy to receive suggestions for improving the usefulness of the Florida Statistical Abstract to you and your organization.

POPULATION

The primary component of the Florida system is its people. Without them Florida consists of a piece of land demarcated by natural and man-made boundaries. With them it becomes a politically, socially, and culturally organized body of persons. Persons are considered to be inhabitants of Florida if at the time a census is taken they claim a designated Florida community as their usual place of residence, that is, where they "live and sleep most of the time." This place may not be the person's legal or voting residence or domicile, although it usually is.

It is the Census of Population taken once every ten years that provides the basic statistics about the population. Data from the 1980 Census are included in the 1981 Florida Statistical Abstract. The numbers of inhabitants and housing units for the state, counties, planning districts, standard metropolitan statistical areas, and municipalities are presented in tables in Section 1.00. Prelminary counts of race and Spanish origin are also included. Detailed characteristics of the population are being released by the Bureau of the Census as they are compiled and will be presented in future issues of this Abstract. Meanwhile reports will be made available by the U.S. Government Printing Office, Washington, D.C. and by the Public Information Office of the U.S. Department of Commerce.

Estimates of the population of the state, counties, and municipalities of Florida are made each year by the Population Program, Bureau of Economic and Business Research (BEBR), University of Florida. These are released annually under the title Florida Estimates of Population. A revised series of these estimates for the 1970s appears in Table 1.20. Extreme caution must be exercised when deriving annual changes from successive estimates. Calculating such changes can lead to inaccurate conclusions regarding population growth, especially for small places. The best base for any estimate of population change is generally the most recent census enumeration. This year, in May 1981, the BEBR issued a publication entitled, Florida Population: A Summary of 1980 Census Results in place of the usual estimates booklet.

The U.S. Bureau of the Census also takes counts of people in small areas at times other than the census years and frequently makes estimates of the population and its characteristics. These estimates are found in Current Population Reports, P-Series. Projections of the population of Florida counties and estimates of such demographic characteristics as age, race, sex, and housing are made by the BEBR Population Program and published in Population Studies. During 1981 and 1982 Population Studies will include subsequent detailed population characteristics as released by the Census Bureau. It is expected that the Census will release final figures on the age and sex of population by county in December 1981.

At the back of this issue of the Abstract will be found an index of all Census information from the 1970 Census of Population and other recent censuses to which readers may refer for comparison.

Data on veterans come from the Bureau of Research and Analysis, Division of Employment Security, Florida Department of Labor and Employment Security. Another source is the U.S. Veterans Administration in Washington, which releases reports on the age, location, and period of service of veterans. Data on aliens are from the Annual Report of the U.S. Immigration and Naturalization Service. Voting age population is presented in Section 21.00.

The U.S. Department of Education, National Center for Education Statistics has issued a report on the education of Hispanics which is abstracted herein.

Definitions and Area Classifications. Persons in the armed services are counted as residents of the area in which their installations are located. College students are considered residents of the communities in which they reside while attending college.

Counties and municipalities are political entities, the boundaries of which are determined by legislative action. But from a sociological point of view the community of which a person considers himself or herself to be a part may not correspond to such a legal entity. Terms like "Greater Jacksonville" or "the Miami area" are used to indicate the real community. People do not hesitate to cross city or county limits or even state lines to work, to buy or sell, or to seek cultural, medical, recreational, or social services. For this reason the U.S. Bureau of the Census has designated communities known as standard metropolitan statistical areas (SMSAs). The standard metropolitan statistical area is defined generally as "a large population nucleus together with the adjacent communities which have a high degree of economic and social integration with it. Official definitions are made in terms of entire counties to facilitate the gathering and comparison of statistical data."

A new set of definitional standards has been prepared by the Office of Federal Statistical Policy and Standards. Section 1 states that a Metropolitan Statistical Area (MSA) will take the place of the previously defined SMSA. To qualify as an MSA an area must have either

(1) A city with a population of at least 50,000 within its corporate limits, or
(2) A Census Bureau urbanized area of at least 50,000 and a total MSA population of at least 100,000.

Two new MSAs have been added in Florida: Fort Walton Beach and Ocala. Additional MSAs and modifications of the boundaries of previously defined SMSAs will be announced as further processing of Census data is made. These changes are being made too late for inclusion in this edition of Abstract.

In Table 1.25 the 1980 population figures for Florida SMSAs as based on the former delineations are presented. For these old definitions see page 2 of the 1980 Florida Statistical Abstract.

A map showing the location of the standard metropolitan statistical areas in Florida is to be found just ahead of this section.

A region that is usually larger than an SMSA is the market region. As defined by the BEBR, a market region represents those counties from which a metropolitan area draws trade and in which its lending institutions make loans. A map of market areas is to be found in Section 1.00.

Agencies of the state government have designated various groups of counties as being parts of districts. There are eleven planning districts, each containing several counties which have common interests and needs for planning development in the area. A map in this section shows the latest pattern of county assignment. There are also health districts enumerated on a map in Section 7.00, climatological districts (map in Section 8.00), crop districts (map in Section 9.00), and congressional districts (map in Section 21.00).

HIGH		15.5	16.3	17.8	20.8	27.1

NOTE: STATE PROJECTIONS ARE BASED ON THREE DIFFERENT SETS OF ASSUMPTIONS REGARDING ANNUAL NET MIGRATION. THE HIGH PROJECTIONS ARE SIMILAR TO THE LARGE MIGRATION LEVELS OF THE FIRST HALF OF THE 1970S WHEN MORE PEOPLE WERE MIGRATING TO FLORIDA THAN EVER BEFORE. THE LOW MIGRATION LEVELS ARE SIMILAR TO THOSE BETWEEN 1975 AND 1977 WHEN FLORIDA POPULATION GROWTH RATES WERE AMONG THE LOWEST SINCE WORLD WAR II. THE MEDIUM ASSUMPTIONS IMPLY ANNUAL NET MIGRATION LEVELS SIMILAR TO THE AVERAGE IN THE 1970S. COUNTY PROJECTIONS ARE BASED ON THE RATIO OF EACH COUNTY'S SHARE OF THE TOTAL STATE INCREASE FROM 1970-80. A MORE DETAILED DESCRIPTION OF THE METHODOLOGY CAN BE FOUND IN THE SOURCE. THE 1980 CENSUS COUNTS HAVE BEEN USED AS THE BASE FROM WHICH TO GENERATE THESE PROJECTIONS.

A/ FIGURES OBTAINED FROM THE 1970 CENSUS OF POPULATION. DETAIL MAY NOT ADD TO TOTALS BECAUSE OF ROUNDING.

NOTE: LAND AREA FIGURES REPRESENT THE TOTAL AREA IN THE COUNTIES IN 1970 AND ARE NOT ADJUSTED FOR LANDS WHICH CANNOT BE DEVELOPED (GOVERNMENT-OWNED PARKS OR RESERVES) OR ARE UNINHABITABLE (SWAMPS OR MARSHES). COUNTY AREAS HAVE BEEN REMEASURED AND THE CENSUS BUREAU WILL RELEASE 1980 FIGURES. SOME COUNTY AREAS MAY CHANGE SLIGHTLY BECAUSE OF PREVIOUS ERRORS IN MEASUREMENT.

2.00

HOUSING

Closely allied with the population is its housing. The decennial Census of Housing is taken simultaneously with the Census of Population and provides basic information about people in their living arrangements. The count of households, persons in households, and persons in group quarters for the state and counties of Florida from the 1980 Census are to be found in Table 2.06. Much of the detail from the 1980 Census will be published in the Florida Statistical Abstract, 1982 and subsequent editions.

The Census Bureau defines a household as all persons who occupy a group of rooms or a single room which constitutes a housing unit. Therefore the counts of households and occupied housing units are identical.

A housing unit is defined by the Bureau of the Census as a "group of rooms or a single room occupied or intended for occupancy as separate living quarters, that is, when the occupants live and eat separately from other persons in the building and have direct access from the outside of the building or through a common hall."

All persons not living in households are classified as living in group quarters. These include institutions offering care or custody as well as dormitories, barracks, monasteries, missions, and large rooming or boarding houses or communes having at least nine persons unrelated to the resident who maintains the living quarters.

Data on low-rent housing, F.H.A., and urban renewal programs are supplied by the U.S. Department of Housing and Urban Development. Two agencies of the State of Florida also provide information. The Division of Motor Vehicles of the Department of Highway Safety and Motor Vehicles publishes annual totals of tags sold to owners of mobile homes and recreational vehicles. The Division of Hotels and Restaurants of the State Department of Business Regulation publishes statistics on apartment houses, rooming houses, and licensed lodgings.

TABLE 2.01. HOUSING INVENTORY: CHARACTERISTICS OF HOUSING AND HOUSEHOLDS BASED ON THE ANNUAL HOUSING SURVEY IN THE ORLANDO STANDARD METROPOLITAN STATISTICAL AREA (SMSA), 1977

ITEM	1970	1974	1977

VITAL STATISTICS AND HEALTH

The Florida Department of Health and Rehabilitative Services is the principal source of vital statistics and morbidity statistics for Florida and its counties. Data are released on a monthly basis and later accumulated in two annual reports, Florida Vital Statistics and Florida Morbidity Statistics. The publications include comprehensive data on births, infant deaths, abortions, illegitimate births, deaths by cause, on marriages, divorces, annulments, and on notifiable diseases. It is well known that many notifiable diseases are incompletely reported, but the degree of under-reporting is not known. For births and deaths, resident is the term which indicates all births or deaths among residents of a specified area regardless of where the event occurred, while recorded is the term used to identify all births or deaths occurring in the specified area regardless of the usual residence of the person counted.

The Division of Mental Health of the Florida Department of Health and Rehabilitative Services publishes each year the Statistical Report of Hospitals containing information on admissions, discharges, and types of illnesses.

Information on health services establishments, employment, and payroll are found in Section 20.00.

TABLE 3.05. RESIDENT LIVE BIRTH RATES: BIRTH RATES PER 1,000 POPULATION BY RACE IN FLORIDA AND THE UNITED STATES, SPECIFIED YEARS 1950 THROUGH 1979

EDUCATION

After housing and health, education becomes an important ingredient of a person's or a community's well-being. Data on the extent of public education, the level achieved by the pupils, and the availability and enrollments of schools, colleges, and universities are included in Section 4.00. Employment and finances of educational institutions and services and data on private schools will be found in Section 20.00, Health, Education, and Cultural Services. Additional information on the public funding of education will be found in Section 23.00.

The principal sources of the basic information on education in Florida include Profiles of Florida School Districts, the annual report of the State Commissioner of Education, the Management Information Services (MIS) of the Division of Public Schools, and other publications of the Department of Education. In Department of Education publications, enrollment refers to the cumulative number of pupils registered during a school year; membership is the number registered at one point in time.

Enrollments in public universities in the state are made available by the Division of Planning and Analysis of the University of Florida. Data on public community colleges have come from reports of the Division of Community Colleges of the Department of Education. Private college information is collected by and published in the annual report of the State Board of Independent Colleges and Universities.

NOTE: DATA WERE OBTAINED FROM THE 1980 FALL STUDENT SURVEY, ESE 269. BECAUSE SOME HIGH SCHOOLS DO NOT HAVE A FORMAL FOLLOW-UP PROGRAM FOR GRADUATES, IT WAS NECESSARY FOR THE PRINCIPAL OR GUIDANCE COUNSELOR TO PREPARE ESTIMATES FOR SOME OF THE ITEMS INCLUDED. FIGURES INCLUDE TWELFTH GRADE GRADUATES FROM ADULT CENTERS AND EXCEPTIONAL AND GIFTED SCHOOLS.

INCOME AND WEALTH

Other important characteristics of the population are personal income and family income. The source for statistics on personal income in Florida is the U.S. Department of Commerce, Bureau of Economic Analysis from unpublished releases. The Bureau of Economic Analysis has made comprehensive estimates of personal income, by type and industrial source, covering all economic areas and standard metropolitan statistical areas (SMSAs) and counties in the nation for selected years from 1929 through 1979. Preliminary 1980 state totals are presented.

Personal income is defined as the current income of persons in an area from all sources. It is measured before deduction of income and other personal taxes, but after deduction of personal contributions to social insurance programs. It consists of wages and salaries (in cash and kind); various types of supplementary earnings, termed other labor income; the net incomes of owners of unincorporated businesses (farm and nonfarm with the latter including the income of independent professionals), termed proprietors income; net rental income, dividends, and interest, termed property income; and government and business transfer payments (consisting in general of disbursements to persons for which no services are rendered currently), termed transfer payments.

The labor and proprietary components of personal income are allocated on a place-of-work basis. These earnings are converted to a place-of-residence basis by means of a residence adjustment factor. Property income and transfer payments are then added to earnings, resulting in total income on a place-of-residence basis. The first basis, earnings by place of work, is useful in the analysis of the income structure of a given area in terms of industrial markets and purchasing power. Expressed on a per capita basis, the latter is an indicator of living standards and welfare level. The population estimates on which the per capita amounts are based are those of the U.S. Bureau of the Census and are not the estimates shown in the population section of this publication. Revisions to these estimates when the 1980 Census numbers are taken into account will result in future revisions of the per capita income numbers. See Section 9.00 for estimates of farm income for Florida and selected other states.

As a part of the 1977 Census of Business, the U.S. Bureau of the Census surveyed businesses owned by blacks, women, and other minority groups.

Updated estimates of national poverty thresholds are published based on data from the U.S. Census Current Population Reports, Series P-60. The U.S. Bureau of Labor Statistics develops the income levels for defining poverty for the Comprehensive Employment and Training Act (CETA) program. The Bureau of Labor Statistics of the U.S. Department of Labor also provides data on family budgets for retired persons and for a family of four.

One record of income is the annual reports of the U.S. Internal Revenue Service. Data this year show sources, deductions, and distribution of income by income class. These come from 1978 Statistics of Income.

LABOR FORCE, EMPLOYMENT, AND EARNINGS

Economic welfare for most individuals and families depends upon employment. The basis of statistics on the employment status of the population is a monthly Current Population Survey conducted by the U.S. Bureau of the Census. Employed persons are defined in the Handbook of Labor Statistics as comprising "all those who, during the survey week, worked at all as paid employees, in their own business or profession, or on their own farm, or who worked 15 hours or more as unpaid workers in an enterprise operated by a family member" and all those temporarily absent from their jobs due to such factors as illness or vacation.

Unemployed persons are defined as those "who did not work during the survey week, who made specific efforts to find a job within the previous four weeks and who were available to work during the survey week except for temporary illness."

The civilian labor force is made up of all civilians classified as employed or unemployed. The unemployment rate is the number of unemployed expressed as a percentage of the civilian labor force. Persons 16 years of age and older not classified as employed or unemployed are counted as not in the labor force.

The Bureau of Research and Analysis, Division of Employment Security, Department of Labor and Employment Security of the State of Florida has the responsibility of preparing these estimates following procedures developed in cooperation with the U.S. Bureau of Labor Statistics. It publishes monthly information about Florida in Florida Employment Statistics and about standard metropolitan statistical areas in Labor Market Trends; special releases are issued on small counties. Different samples are used to prepare these sets of employment and unemployment estimates. A quarterly report on the characteristics of the insured unemployed is also released. Forecasts of the market for persons in various occupations are made from time to time under the title, Florida Employment Directions.

The U.S. Bureau of Labor Statistics compiles statistics and publishes data on nonagricultural employment in Florida and its standard metropolitan statistical areas (SMSAs). Its publications include Employment and Earnings: States and Areas, Geographic Profile of Employment and Unemployment, monthly and annual surveys of Work Stoppages, Directory of National Unions and Employee Associations, and the Handbook of Labor Statistics. It also publishes a series of bulletins under the title News, each of which contains data on a topic of interest related to employment. This year one issue was devoted to union memebership. Another source of data on employment is the decennial Census of Population conducted by the U.S. Bureau of the Census. The 1980 Census numbers on employment will probably be available in late 1982. Data on federal employees in Florida come from the annual report of the Office of Personnel Management of the U.S. Civil Service Commission. The Employment and Training Report of the President is the source of information on enrollments under the Comprehensive Employment and Training Act and also contains much other employment data.

Statistics on agricultural employment are made available by the Florida Crop and Livestock Reporting Service.

Tables of covered employment and payroll are presented in sections of this Abstract devoted to individual industries and nonprofit organizations. Any such firm or nonprofit establishment whose employees are covered by state and federal unemployment laws must submit monthly reports (ES-202) on the number of persons on its payroll and the amount they were paid so that the appropriate tax can be computed and collected. The data this generates provide useful measurements of the impact of various kinds of industries, firms, or other organizations on the economies of the state and counties. The Bureau of Research and Analysis of the Division of Employment Security of the Florida Department of Labor and Employment Security compiles these statistics. In these reports the number of reporting units is the average for the quarter, employment is for the week of the 12th in the specified month, and payroll is for the entire quarter.

It should be borne in mind that covered employment data are not as complete as those of the U.S. Census of Business since certain workers are specifically excluded from coverage. These are principally railroad and some agricultural, local government, and domestic employees and self-employed workers. Also excluded are most nonprofit organizations with fewer than four employees. Included among the self-employed are such types of persons as insurance or real estate agents and barbers whose remuneration is solely by way of commissions. Beginning with January 1, 1978, coverage of the Florida Unemployment Compensation Law was extended to include (1) employees of agricultural establishments in SIC industries 01, 02, and 07 that meet minimum employment and payroll standards, (2) employees of nonprofit schools, SIC industry code 821, (3) domestic workers for employees reporting payrolls of at least $1,000 a quarter, SIC code 881, and (4) public service employees whose positions are funded through contract with CETA (Comprehensive Employment and Training Act) prime sponsors. These would be mostly in SIC codes 80, 82, 83, 86, and 91.

Also missing from the tables are categories for the state or counties in which there were no firms or so few units that the information for an individual establishment might be made public or estimated by competitors. Where one firm in a specific category has 80 percent of the payroll of all the business in that category ranges have been substituted for total amounts to avoid disclosure but give some idea of the magnitudes involved.

The derivation and meaning of SIC codes are discussed in the preface of this Abstract. Table 6.13 presents data for all covered employees by industry and Table 6.14 by county.

Detailed employment data for governments can be found in Section 23.00.

Estimates of wage and salary employment are supplied annually by the U.S. Bureau of Economic Analysis, Table 6.41. The U.S. Bureau of Labor Statistics provides estimates of the duration and reason for unemployment by state.

Readers should be aware of another source of data on employment by county and industry: County Business Patterns published each year by the U.S. Bureau of the Census. It provides information on employment by SIC code in the state and counties of Florida.

SOCIAL INSURANCE AND WELFARE

In this section are data related to government programs for old-age, survivors, disability, and health insurance; and public assistance.

Old-age, survivors, disability, and health insurance--popularly referred to as social security--provides monthly cash benefits to retired or disabled insured workers and their dependents and to the survivors of an insured worker. The source of statistics on these programs is the U.S. Department of Health and Human Services and the Social Security Administration in the Social Security Bulletin, published monthly, Medicare, Annual Report, and in special reports. One such is Disposition of Public Assistance Cases Involving Questions of Fraud, 1979.

The U.S. Department of Health and Human Services, Social Security Administration publishes data on state programs. Workmen's compensation provides protection against work-connected injuries and deaths. Data on this program are published periodically in the Social Security Bulletin.

Four public assistance programs--for the aged, the blind, the permanently and totally disabled, and dependent children--are administered by the state but are financed in part by the federal government in grants to states under the Social Security Act. The principal source of state and national data on these programs is the U.S. Department of Health and Human Services. The principal source of data on Florida and Florida's counties is the Florida Department of Health and Rehabilitative Services, Annual Statistical Report. The Division of Unemployment Insurance of the Florida Department of Labor and Employment Security has published a report entitled Historical Series of Unemployment Insurance, 1937-79.

Information about state assistance is also reported in the Annual Report of the Comptroller; See Table 23.50.

TABLE 7.03. MEDICARE: BENEFICIARIES, JANUARY 1, 1979, AMOUNT REIMBURSED ADMISSIONS, AND HOME HEALTH VISITS, 1978, IN FLORIDA AND THE UNITED STATES

TABLE 7.58. UNEMPLOYMENT INSURANCE: SPECIFIED DATA FOR FLORIDA, SEPTEMBER 1978 AND MARCH 1979 AND 1980

ITEM	SEPTEMBER 1978	MARCH 1979	MARCH 1980
AVERAGE WEEKLY INSURED UNEMPLOYMENT			
NUMBER OF WORKERS 1/	64,178	50,990	57,921
PERCENTAGE OF COVERED EMPLOYMENT 2/	2.3	1.7	1.8
INITIAL CLAIMS 3/ (WEEKLY AVERAGE)	6,180	5,459	5,920
ALL TYPES OF COMPENSATED UNEMPLOYMENT			
NUMBER OF FIRST PAYMENTS	12,029	9,831	10,366
WEEKS COMPENSATED	199,952	126,079	138,506
BENEFITS PAID 4/ ($1,000)	12,290	8,100	9,993
AVERAGE WEEKLY NUMBER OF BENEFICIARIES	47,608	28,654	32,978
AVERAGE WEEKLY BENEFIT FOR TOTAL UNEMPLOYMENT (DOLLARS)	62.59	65.53	73.32
NUMBER OF CLAIMANTS EXHAUSTING BENEFITS	5,778	3,697	3,870

1/ WORKERS REPORTING COMPLETING AT LEAST ONE WEEK OF UNEMPLOYMENT.
2/ BASED ON AVERAGE COVERED EMPLOYMENT FOR MOST RECENT 12-MONTH PERIOD.
3/ NOTICES FILED BY WORKERS TO INDICATE THEY ARE STARTING PERIODS OF UNEMPLOYMENT. EXCLUDES TRANSITIONAL CLAIMS.
4/ VOIDED BENEFIT CHECKS AND TRANSFERS UNDER INTERSTATE COMBINED-WAGE PLAN NOT DEDUCTED. EXCLUDES PAYMENTS MADE UNDER TEMPORARY UNEMPLOYMENT INSURANCE PROVISIONS.

TABLE 7.59. WORKMEN'S COMPENSATION: ESTIMATES OF PAYMENTS BY TYPE OF INSURANCE IN FLORIDA, 1977 THROUGH 1979

(ROUNDED TO THOUSANDS OF DOLLARS)

ITEM	1977	1978	1979 A/
TOTAL	301,415	307,868	325,940
INSURANCE LOSSES PAID BY PRIVATE INSURANCE CARRIERS 1/	265,315	270,868	286,940
STATE AND FEDERAL FUND DISBURSEMENTS 2/	0	0	0
SELF-INSURANCE PAYMENTS 3/	36,100	37,000	39,000
PERCENTAGE CHANGE IN TOTAL PAYMENTS FROM PREVIOUS YEAR	8.3	2.1	5.9

A/ PRELIMINARY.
1/ NET CASH AND MEDICAL BENEFITS PAID DURING THE CALENDAR YEAR BY PRIVATE INSURANCE CARRIERS UNDER STANDARD WORKMEN'S COMPENSATION POLICIES.
2/ NET CASH AND MEDICAL BENEFITS PAID BY STATE FUNDS COMPILED FROM STATE REPORTS (PUBLISHED AND UNPUBLISHED); ESTIMATED FOR SOME STATES.
3/ CASH AND MEDICAL BENEFITS PAID BY SELF-INSURERS, PLUS THE VALUE OF MEDICAL BENEFITS PAID BY EMPLOYERS CARRYING WORKMEN'S COMPENSATION POLICIES THAT DO NOT INCLUDE THE STANDARD MEDICAL COVERAGE. ESTIMATED FROM AVAILABLE STATE DATA.

SOURCE FOR TABLES 7.58 AND 7.59: U.S., DEPARTMENT OF HEALTH AND HUMAN SERVICES, SOCIAL SECURITY ADMINISTRATION, SOCIAL SECURITY BULLETIN, OCTOBER 1980, AND PREVIOUS EDITIONS. 1979 DATA ON TABLE 7.59 FROM PREPUBLICATION RELEASE.

8.00

GEOGRAPHY AND CLIMATE

Florida, the people, is contained in Florida, the land, with its variety of elevations, water surfaces, vegetation, and animal life. Basic, too, to the quality of life and the economy of the state are such aspects of climate as temperature, length of season, and rainfall. These are the environmental factors described in Section 8.00.

Political subdivisions are described in the introduction to Section 1.00, Population. In this section the natural phenomena are, to the extent possible, related to cities and/or counties.

Tables in the section which contain information relating to temperature, precipitation, and other climatological phenomena are based on data supplied by the Environmental Data and Information Service of the National Oceanic and Atmospheric Administration, U.S. Department of Commerce. Their publications are issued both annually and monthly under the title, Climatological Data, Florida. Information on areas comes from another agency of the Commerce Department, the Bureau of the Census.

Information pertaining to the ownership of land in Florida by the federal government comes from the Bureau of Land Management of the U.S. Department of the Interior and the U.S. General Services Administration.

AGRICULTURE

Agriculture, of all the industries, comes first not only because it is the oldest but because it is the most dependent on nature. It makes not only a direct contribution to the income and employment of Floridians but also an indirect contribution through support industries and manufacturing. Data on farm income is presented in Section 5.00 with income data from other sources.

A Census of Agriculture has been taken every five years through 1974. In order to put this census on the same basis as the other economic censuses, the count planned for 1979 was moved forward to 1978. 1978 Census data dealing with the characteristics of farms and farm operators are presented in this section. A farm is now defined as "any place from which $1,000 or more of agricultural products were sold or nomally would have been sold during the census year." The category "farms with sales of $2,500 or more" includes only farms with actual sales of $2,500 or more. For 1969 and 1974, farms reporting sales of less than $2,500 but having the production potential for sales over $2,500 are included in most tables under the category farms with sales of $2,500 or more.

Current estimates of the number of farms and their acreage will be found herein. One made by the U.S. Department of Agriculture was published in Agricultural Statistics 1980. Estimates of farms by county made by the Agricultural Stabilization and Conservation Services of the U.S. Department of Agriculture are also included. Readers will note that there is a considerable increase in the number of farms reported in the Census of 1978 as compared with 1974. These numbers are not directly comparable because the 1978 numbers include data for farm operators represented on the mail list plus estimates from a direct enumeration sample for farms not represented on the mail list. The 1974 data include only operations represented on the mail list. The number of farms counted for 1974 for Florida if adjusted on the same ratio of marketing mailing list to direct enumeration counts would result in an estimated value for Florida for 1974 of 42,727. The number of 44,165 for 1978 would then be only an increase of 3.4 percent. The farms missed in 1974 were usually small; thus acreages, inventories, and marketings are generally comparable.

Timely and detailed data on farm receipts, income, production, and value of farm marketings are provided in tables based on annual publications of the U.S. Department of Agriculture, Agricultural Outlook, Agricultural Statistics, Economic Indicators of the Farm Sector: State Income and Balance Sheet Statistics, 1979, and other publications. Two additional sources are the Crop and Livestock Reporting Service, Orlando, and the Agricultural Experiment Station of the University of Florida, Gainesville.

When comparisons are made between Florida and other states, the other states selected either have a similar climate (the southern tier of sunbelt states) or produce similar crops (citrus in Arizona and California, sugarcane in Hawaii and Louisiana, eggs in Alabama and Mississippi, etc.).

Expanded coverage of the Florida Unemployment Compensation Law beginning in 1978 has permitted the Florida Department of Labor and Employment Security to supply more comprehensive data on establishments, employees, and payrolls of agricultural establishments, SIC Codes 01, 02, and 07.

The 1978 Census of Agriculture includes data on agricultural services, that is industries classified 07 by the SIC Code. For purposes of this Census an agricultural service establishment is an economic unit primarily engaged in performing for others on a fee or contract basis the following: soil preparation services, crop services, veterinary services, other animal services, farm labor and management services, and landscape and horticultural services. Self-employed persons, farm workers, and domestic service workers are specifically excluded. "Primarily engaged" is defined as having received a greater amount of gross receipts for agricultural service activities than for any other major SIC group of activities.

Data on some of the financial aspects of the industry come from the Agricultural Stabilization and Conservation Service's Annual Report.

Information about acreage devoted to citrus cultivation is from the Florida Crop and Livestock Reporting Service. Also there are data on the consumption of fertilizers from the Florida Department of Agriculture and Consumer Services. An annual estimate of the retail value of agricultural production by product in Florida in published in the Abstract each year. It is prepared by Professor Ralph A. Eastwood of the Institute of Food and Agricultural Services of the University of Florida.

(NA) NOT AVAILABLE.

1/ ALL THE DATA IN THESE TWO COLUMNS RELATES TO THE VALUE PRODUCERS RECEIVE WHEN TITLE TO THEIR PRODUCTS CHANGES THE FIRST TIME. IN THE LANGUAGE OF ITS ART, THE CITRUS INDUSTRY REFERS TO THIS AS "DELIVERED-IN" VALUE. THAT VALUE IS GREATER THAN "ON-TREE" VALUE BY THE AMOUNT OF "PICK AND HAUL" PAID BY THE GROWER TO HARVEST HIS FRUIT AND DELIVER IT TO THE BUYER.

2/ INCLUDES DAIRY.

3/ EXCEPT BEEF AND VEAL.

4/ CASH PORTION.

5/ INCLUDES ESTIMATES OF ADDITION AGRICULTURE FOR GREENHOUSE NURSERY.

FORESTRY, FISHERIES, AND MINERALS

In addition to agriculture, other basic industries in which people work closely with nature to develop resources and production are forestry (SIC code 08), fisheries (SIC code 09), and mining (SIC codes 10 through 14).

The American Forest Institute provides data on tree farms. Employment and payroll data come from the Florida Department of Labor and Employment Security, as does similar information for fisheries and mining. See the introduction to Section 6.00. Acreage devoted to commercial forests by county is estimated by the Forest Service of the U.S. Department of Agriculture. The Department of Forestry of the Florida Department of Agriculture and Consumer Services has estimated county income from forest products and published data on types of forest by region and county.

The National Marine Fisheries Service of the U.S. Department of Commerce provides data on fish landings and fishery products, plants, and cooperatives. Data on fish kills are provided by the U.S. Environmental Protection Agency. The Food and Resource Economics Department of the Institute of Food and Agricultural Sciences, University of Florida has issued a staff paper on Economic Impact Estimates for Florida's Commercial Fisheries, 1978.

Basic data on the production of minerals are from preprints of the Minerals Yearbook and specific industry reports of the Bureau of Mines of the U.S. Department of Interior. Additional information this year on the status of the minerals industry in Florida comes from the 1977 Census of Mineral Industries published, of course, by the U.S. Bureau of the Census. An index of Census tables appearing in previous Abstracts is at the back of this edition.

Land Areas of the National Forest System comes from the U.S. Department of Agriculture, Forest Service.

CONSTRUCTION

In this section are statistics on building construction activity and characteristics of the industry (SIC codes 15-17). The principal source of construction data for Florida is the Bureau of Economic and Business Research, University of Florida, in its several publications. The Bureau publishes monthly, quarterly, and annual summaries on the type and value of building permits for construction issued by administrative offices in each of approximately 430 places in Florida, in Building Permit Activity in Florida. Additional sources of data on construction in the various states are reports available from F.W. Dodge Company, a division of McGraw-Hill, Inc.; the Construction Review, published monthly by the Bureau of Industrial Economics of the U.S. Department of Commerce; and Construction Reports: Value of New Construction Put in Place (and other topics), published by the U.S. Bureau of the Census.

Information on the construction industry such as receipts, employment, and value added from the 1977 Census of Construction Industries is published in this 1981 Florida Statistical Abstract. An index of Census tables appearing in previous Abstracts is at the back of this edition. Data on employment and payrolls are supplied by the Florida Department of Labor and Employment Security, as described in the introduction to Section 6.00.

UNITED STATES	267,289	275,881	276,854	221,565

1/ STATES WITH 1980 SHIPMENTS OF 2,000 OR MORE ARE LISTED.

NOTE: A MOBILE HOME IS DEFINED AS A MOVEABLE DWELLING, TEN FEET OR MORE WIDE AND THIRTY-FIVE FEET OR MORE LONG, DESIGNED TO BE TOWED ON ITS OWN CHASSIS, WITH TRANSPORTATION GEAR INTEGRAL TO THE UNIT WHEN IT LEAVES THE FACTORY, AND WITHOUT NEED OF A PERMANENT FOUNDATION. THESE MOBILE HOMES INCLUDE DOUBLE-WIDES AND EXPANDABLE MOBILE HOMES. EXCLUDED ARE TRAVEL TRAILERS, MOTOR HOMES, AND MODULAR HOUSING. THE SHIPMENTS FIGURES ARE BASED ON REPORTS SUBMITTED BY MANUFACTURERS ON THE NUMBER OF MOBILE HOMES ACTUALLY SHIPPED DURING THE SURVEY MONTH. SHIPMENTS TO DEALERS MAY NOT BE PLACED FOR RESIDENTIAL USES IN THE SAME MONTH AS THEY ARE SHIPPED. THE NUMBER OF MOBILE "HOMES" USED FOR NONRESIDENTIAL PURPOSES IS NOT KNOWN. THESE SHIPMENTS STATISTICS ARE PRODUCED BY THE NATIONAL CONFERENCE OF STATES ON BUILDING CODES AND STANDARDS.

MANUFACTURING

The natural products of the farms, forests, fisheries, and mines are transformed into new products by the manufacturing industry. A manufacturing establishment, as defined by the U.S. Bureau of the Census, usually consists of a single physical location at which this transformation is performed. Traditionally economists have referred to manufacturing as the creation of form utility. Major industry divisions comprise SIC codes 20-39.

Data on the number of units, number of employees, and payroll for 1980 are published herein. These were obtained from the Bureau of Research and Analysis, Division of Employment Security of the Florida Department of Labor and Employment Security. A number of additional industries are detailed, including county breakdowns.

The U.S. Bureau of the Census conducts a complete count of manufactures every five years and a sample survey in intervening years. Data from the 1977 Census are included in this edition of the Abstract. An index of Census tables appearing in previous Abstracts is at the back of this edition. The sample survey is called the Annual Survey of Manufactures. The 1978 survey was not available at press time for this issue of the Abstract.

Another source of such information is the 1979 Survey of Industrial Purchasing Power, published by Sales and Marketing Management, 633 Third Avenue, New York, New York 10017.

A publication of the Division of Economic Development of the Florida Department of Commerce called Florida Facts is the source of a list of the larger manufacturers in the state.

1/ THESE DATA ARE ESTIMATES BASED ON A REPRESENTATIVE SAMPLE OF ESTABLISHMENTS CANVASSED ANNUALLY AND MAY DIFFER FROM THE RESULTS OF THE COMPLETE CENSUS OF ALL MANUFACTURING ESTABLISHMENTS CONDUCTED EVERY FIVE YEARS.

2/ DEFINITION OF THIS STANDARD METROPOLITAN STATISTICAL AREA WAS REVISED FOR 1972 TO INCLUDE PINELLAS, HILLSBOROUGH, AND PASCO COUNTIES. DATA TABULATED UNDER THE NEW 1972 DEFINITION DIFFER BY MORE THAN 5 PERCENT FROM 1972 DATA TABULATED UNDER THE OLD DEFINITION, WHICH INCLUDED ONLY PINELLAS AND HILLSBOROUGH COUNTIES. HISTORICAL DATA PRIOR TO 1972 ARE BASED ON PRIOR CENSUS-YEAR DEFINITIONS.

TRANSPORTATION

The principal sources of information about railroads (SIC 40) are the Public Service Commission of the State of Florida, the Yearbook of American Railroad published by the Association of American Railroads, and the Florida Department of Revenue, which supplies data on the value of rights-of-way.

Employment and payroll figures for all modes of transportation except railroads are supplied by the Florida Department of Labor and Employment Security. Railroads are not included because their employees are not covered by the same unemployment law as workers in other industries.

The U.S. Department of Transportation provides data on roads and highways, tax receipts, and vehicles in Highway Statistics, a publication of the Federal Highway Administration. The same agency publishes annually a reported entitled Fatal and Injury Accident Rates on Federal-Aid and Other Highway Systems. Information about licenses and drivers of motor vehicles comes from the Florida Department of Highway Safety and Motor Vehicles. The same source publishes Traffic Accident Facts. The 1977 Census of Transportation is the source of survey data on characteristics and uses of trucks in Florida, published under the title Truck Inventory and Use Survey.

Water transportation (SIC 44) includes both the movement of vessels through Florida waterways and the volume of commodities shipped into and out of Florida ports. The authorities of the various ports in the state have supplied data on their activities. The volume of waterborne exports and imports is supplied by the Bureau of the Census in an annual report.

Air transportation (SIC 45) is represented by data showing exports and imports obtained from U.S. Airborne Exports and General Imports, published by the Bureau of the Census of the U.S. Department of Commerce. Air traffic information comes from two sources developed by the Federal Aviation Administration of the U.S. Department of Transportation: FAA Air Traffic Activity and Airport Activity Statistics of Certified Route Air Carriers.

International movements of aircraft are reported in the Annual Report on the State of Finances, U.S. Secretary of the Treasury.

1978	7,068.9	9.7	5,738.0	26.1	1,151.8	152.9
1979	7,519.4	6.4	6,011.0	28.2	1,259.7	220.5

NOTE: EXCLUDES VEHICLES OWNED BY THE MILITARY SERVICE.

SOURCE FOR TABLES 13.27 AND 13.28: U.S., DEPARTMENT OF TRANSPORTATION, FEDERAL HIGHWAY ADMINISTRATION, HIGHWAY STATISTICS, 1979, AND PREVIOUS EDITIONS.

TABLE 13.29. FREE FLOW SPEED DATA: SPEEDS OF FREE-MOVING VEHICLES ON STRAIGHT OPEN SECTIONS OF ROADS POSTED FOR 55 MILES PER HOUR SPEED LIMITS BY TYPE OF HIGHWAY FOR FLORIDA AND THE UNITED STATES, FISCAL YEAR 1978-79

ITEM	AVERAGE SPEED	MEDIAN SPEED 1/	85TH PER-CENTILE SPEED 2/	PERCENTAGE EXCEEDING-- 55 MPH	60 MPH	65 MPH
INTERSTATE URBAN						
FLORIDA	52.8	54.1	60.1	41	13	3
U.S. AVERAGE	56.4	56.3	61.2	58	21	5
INTERSTATE RURAL						
FLORIDA	60.2	60.0	66.3	81	46	17
U.S. AVERAGE	58.3	58.1	63.1	72	32	9
MULTI-LANE 3/						
FLORIDA	56.3	57.0	63.3	60	26	7
U.S. AVERAGE	54.9	55.0	60.2	47	16	4
2-LANE RURAL						
FLORIDA	54.4	55.5	62.7	50	22	7
U.S. AVERAGE	54.3	54.2	59.8	44	16	4

MPH MILES PER HOUR.

1/ MEDIAN SPEED IS THE SPEED AT OR BELOW WHICH 50 PERCENT OF THE VEHICLES ARE TRAVELING.

2/ 85TH PERCENT SPEED IS THE SPEED AT OR BELOW WHICH 85 PERCENT OF THE VEHICLES ARE TRAVELING.

3/ INCLUDES BOTH DIVIDED AND UNDIVIDED ROADS.

NOTE: DATA ARE BASED ON STATE CERTIFICATION REPORTS AND ARE FREE-MOVING VEHICLE SPEEDS, NOT AVERAGE OPERATING SPEEDS.

TABLE 13.30. MOTOR VEHICLE TRAFFIC ACCIDENTS: ACCIDENTS, FATALITIES, AND INJURIES IN FLORIDA AND THE UNITED STATES, FISCAL YEAR 1979

ITEM	NUMBER	RATE PER 100 MILLION VEHICLES
VEHICLE MILES (MILLIONS)		
FLORIDA	74,651	(X)

COMMUNICATIONS

Newspaper publishing and other print media (SIC 27) are considered to be manufacturing by the U.S. Bureau of the Census as well as the Office of Management and Budget, which establishes the Standard Industrial Classification. But since newspapers, periodicals, and books compete with electronic media in providing communications, data are repeated in this section.

Also included in Section 14.00 are data on the U.S. Postal Service (SIC 43), supplied by its southern regional headquarters in Memphis, telephones (SIC 481), telegraph (SIC 482), and radio and television broadcasting (SIC 483). The Florida Public Service Commission supplies data on telephone companies in Florida. Employment and payroll data are from the Florida Department of Labor and Employment Security, Division of Employment Security, Bureau of Research and Analysis. In two tables dealing with employment and payroll, ranges have been substituted for total amounts in order to avoid disclosure of information about individual establishments.

Two copyrighted sources have been used with permission: Editor and Publisher International Yearbook for newspaper circulation, and Broadcasting magazine for radio and television broadcast revenues.

POWER AND ENERGY

Energy is an industry (SIC code 49) and also a national concern. Data in this section have been selected to describe the status of the electric, gas, and sanitary service industries, and the consumption of electricity, gas, gasoline, and fuel oil.

A major source of data on both aspects of the energy situation in Florida is Statistics of the Florida Electric Utility Industry, published by the Florida Public Service Commission. The Governor's Energy Office issues Monthly Florida Gasoline Consumption. New this year are data on gasoline consumption by planning district. The Division of Employment Security of the State Department of Labor and Employment Security supplies information on employment and payroll in the utility industry.

The Public Service Commission of Florida also supplies data on typical gas bills, generating capacity, and average consumption of electricity. Typical electric bill information comes from the U.S. Federal Power Commission.

Consumption of motor fuel data are obtained from the publication Highway Statistics of the Federal Highway Administration, the Florida Department of Revenue, and the Annual Report of the Comptroller, State of Florida

Several tables provide data on the gas industry in Florida. These come from Gas Facts published by the American Gas Association. The U.S. Department of Energy, Energy Information Administration in the publications State Energy Data Report, 1960-78, Typical Electric Bills, 1980, and Cost and Quality of Fuels for Electric Utility Plants, January 1, 1980 makes available data on energy consumption over time.

Additional information on the reserves and production of natural gas and petroleum are to be found in Section 10.00.

TABLE 15.01. ENERGY CONSUMPTION: GROSS AMOUNT CONSUMED BY TYPE OF FUEL IN FLORIDA 1960 THROUGH 1978

WHOLESALE AND RETAIL TRADE

Basic classifications in these fields as determined by the U.S. Bureau of the Census place business establishments into three groups: (1) wholesale trade--establishments primarily engaged in selling merchandise to retailers, to institutions, to industrial, commercial, and professional users, or to other wholesalers; (2) retail trade--businesses primarily engaged in selling merchandise for personal, household, or farm consumption; and (3) service industries--establishments primarily engaged in rendering a wide variety of services to individuals and business establishments. Data referring to wholesale and retail trade (SIC 50-59) are located in Section 16.00. Data on services will be found in Sections 18.00, 19.00, and 20.00.

Only limited data from the 1977 Census of Wholesale and Retail Trade are contained herein. Detailed tables of information from the 1977 Census of Wholesale and Retail trade and which are considered to be of a benchmark nature were included in the 1980 Florida Statistical Abstract. An index of Census tables appearing in previous Abstracts is at the back of this edition. Number of establishments, employment, payroll, and sales are analyzed both by kind of business and by geographical areas such as counties, municipalities, and standard metropolitan statistical areas therein.

Covered employment and payroll information by kind of business and county for March 1980, are included herein. These come from the Bureau of Research and Analysis of the Division of Employment Security of the Florida Department of Labor and Employment Security; see the introduction to Section 6.00. Since there are some differences in coverage and classification, these figures are not necessarily comparable with those from the economic censuses. This year additional tables based on ES-202 information are included. County totals are shown in Table 16.44. A detailed list of the two-and three-digit classifications that comprise these totals is shown in Table 16.43. Some three-digit retail categories are reported in Section 19.00 and Section 20.00.

The Florida Department of Revenue is the source for information on sales reported by firms in connection with the sales and use tax laws. In addition to the tables presented in this section, printouts of county gross and taxable sales by business category are available from the Bureau of Economic and Business Research on a subscription basis. These also vary in coverage and classification from either the census or the Florida Department of Commerce figures. Data on retail sales tax collections may be found in Table 23.43. A time series of gross and taxable sales is to be found in Table 24.30.

The U.S. Bureau of the Census is responsible for the monthly data on department store sales.

A list of retailers with large numbers of employees is supplied by the Florida Department of Commerce, Division of Economic Development in Florida Facts. Professional persons who operate at the retail level and are required to have a license such as dispensing opticians or pharmacists are kept track of and reported by the Florida Department of Professional Regulation.

FINANCE, INSURANCE, AND REAL ESTATE

Industries covered in this section are those SIC codes numbered 60 through 67, including banking and other credit agencies, establishments dealing in securities and commodities, insurance and real estate offices, and holdings and investment firms.

Banks in Florida are organized under both Florida law and federal law. State-chartered banks are supervised by the Comptroller of the State of Florida and "national" banks, organized under federal law, are supervised by the Comptroller of the Currency of the United States.

Summaries of banking data for Florida may be found in the Annual Report of the Florida Division of Banking. Another major source of banking data is the Annual Report of the Federal Deposit Insurance Corporation. The figures on number of units, employment, and payroll come from the Florida Department of Labor and Employment Security, Division of Employment Security. See the introduction to Section 6.00.

Sources of information on savings and loan associations include the Annual Report and monthly Trends published by the Florida Savings and Loan League.

The Florida Credit Union League publishes the Credit Union Statistical Yearbook, which is the source of data on credit unions. The Florida Office of the Comptroller issues an Annual Report: Florida Chartered Credit Unions.

A basic source of information on activities on insurance companies in Florida is the Annual Report of the Florida Department of Insurance, Office of State Treasurer and Insurance Commissioner. A source of information on the United States and for individual states is the Life Insurance Fact Book, published annually by the American Council of Life Insurance. Another source is Insurance Facts, published by the Insurance Information Institute. Data on health insurance are from the Health Insurance Institute, Source Book of Health Insurance Data.

Financing of homes by the FHA is summarized in a report, FHA Homes, 1980, issued by the U.S. Department of Housing and Urban Development.

PERSONAL AND BUSINESS SERVICES

Services differ from trade in that no tangible product changes hands. (One hotel chain used to advertise, "We sell sleep.") Services are performed by business and nonprofit establishments for individuals, business firms, government agencies, and nonprofit organizations.

According to the Standard Industrial Classification System services are coded from SIC 70 to SIC 89. In this section tables based on the establishments covered by the unemployment insurance law cover personal services (SIC 72), business services (SIC 73), auto repair services and garages (SIC 75), miscellaneous repair services (SIC 76), and services not elsewhere classified (SIC 89). Information about establishments with other service SIC codes are to be found in Sections 19.00, 20.00, and 23.00.

Results of the 1977 Census of Service Industries are summarized in Section 18.00. These cover establishments classified from SIC 70 to SIC 79, SIC 8072, SIC 81 and SIC 891. More detailed information from this Census was published in the 1980 Florida Statistical Abstract. Because the total number of establishments and total amounts of employment, payroll, and receipts are widely employed for market analysis and because these same totals for 1977 can be compared with totals by kind of business and by geographical area for 1972 and prior census years, they are all included in this section even though some of the kinds of business logically go elsewhere. An index of Census tables appearing in previous Abstracts is at the back of this edition.

Readers are cautioned that when comparisons are made between data for 1977 and those for previous census years it should be noted that changes in boundaries of SMSAs and municipalities and in kind of business classification have taken place.

Data on establishments, employment, and payroll of service establishments whose employees are covered by the unemployment insurance law are provided by the Division of Employment Security of the Florida Department of Labor and Employment Security; see the introduction to Section 6.00. Data for the same area and industry from the Census of Service Industries are not necessarily comparable because of differences in procedures, definitions, and establishments covered.

Many service establishments are operated by professional individuals who are licensed by the state. Data on the holders of such licenses have been supplied by the Florida Department of Professional Regulation. New this year are tables of data on real estate brokers and salesmen, engineers, accountants, funeral directors, and embalmers.

TABLE 18.01. SELECTED SERVICE INDUSTRIES: ESTABLISHMENTS, RECEIPTS, AND RECEIPTS PER ESTABLISHMENT IN FLORIDA, CENSUS YEARS 1948 THROUGH 1977

CENSUS YEAR	ESTABLISHMENTS		RECEIPTS		RECEIPTS PER ESTABLISHMENT	
	NUMBER	PERCENTAGE CHANGE	AMOUNT ($1,000)	PERCENTAGE CHANGE	AMOUNT (DOLLARS)	PERCENTAGE CHANGE

19.00

TOURISM AND RECREATION

Tourism is widely regarded as one of Florida's major economic activities. Indeed it is but, unfortunately for students of the state's economy, there is no such thing as a tourist industry. There are many firms in a number of different industries which derive a greater or lesser proportion of their receipts or sales from tourists. A person wanting to construct a model of tourism for Florida must put together a structure from many bits and pieces. The editors have attempted to bring together in Section 19.00 a number of these bits and pieces, leaving it to the reader to utilize them as he or she sees fit.

Information collected for the 1977 Census of Transporation: Travel During 1977 was published in the 1980 Florida Statistical Abstract. These data have not been repeated this year. A Survey of the Impact of Travel on State Economies came from the U.S. Travel Data Center and is published with their permission.

Data on employment in tourist and recreation-related industries come from the Bureau of Research and Analysis, Division of Employment Security, Florida Department of Labor and Employment Security.

The Division of Tourism of the Florida Department of Commerce issues quarterly and county reports of tourist information and an annual report, Executive Summary: Florida Tourist Study. It also supplied the unpublished results of a survey of Florida's top festivals and events. Tourist facilities include hotels, motels, and food service establishments which are regulated by the Division of Hotels and Restaurants of the Florida Department of Business Regulation. The Florida Revenue Department provides information on the sales of tourist-related businesses. Some of these data were published in Section 16.00 and are repeated here.

Data on boats registered by county in Florida are provided by the Department of Natural Resources, Divisicn of Recreation and Parks. This agency also provides information as to the nature, size, and popularity of state parks and memorials. Data on national parks in Florida were abstracted from the National Park Statistical Abstract published by the National Park Service of the U.S. Department of the Interior.

The volume of automobile tourists can be estimated from the numbers recorded and reported by the Division of Transportation Planning of the Florida Department of Transportation at strategic highway locations around the state. Estimates are made by the Florida Division of Tourism of the number of tourists entering Florida. Automobile traffic figures are based on daily counts made on highways entering the state by the Department of Transportation. Air traffic figures are based on arrivals at major airports. Estimates utilize a tourist base first established in 1973 and updated annually. Individual vistors are interviewed on a randomly selected basis. They are queried regarding expenditures and length of stay. Sample results are expanded to the total visitor population.

HEALTH, EDUCATION, AND CULTURAL SERVICES

Data in this section are to be differentiated from those in Section 3.00, Vital Statistics and Health, and Section 4.00, Education, in that here the concern is with the establishments and employees who perform the included services and the financial aspects involved. In the above sections the concern is with the availability of services to the people of Florida and their utilization of them.

Services covered herein are medical and health (SIC code 80), educational (SIC code 82), and museums and botanical and zoological gardens (SIC code 84).

Data on employment are from the covered employment and payroll figures supplied by the Bureau of Research and Analysis, Division of Employment Security of the Florida Department of Labor and Employment Security.

Information on physicians, dentists, nurses, other licensed health service practitioners and professionals comes from the Department of Professional Regulation, State of Florida. Dispensing opticians and pharmacists will be found in Section 16.00 since they are usually involved in retail trade.

Bed capacity of licensed hospitals and nursing homes is reported by the Office of Licensure and Certification in the Florida Department of Health and Rehabilitative Services.

Educational establishment information comes from the Florida Department of Education: the annual report of the Commissioner of Education, Profiles of Florida School Districts; the Division of Community Colleges of the Florida Department of Education, Report for Florida Community Colleges; the Division of Public Schools, MIS Statistical Briefs and MIS Statistical Reports; State Board of Independent Colleges and Universities, Annual Report; and the National Center for Educational Statistics of the U.S. Department of Education.

Library information is supplied by the Division of Library Services of the Florida Department of State in Florida Library Directory and Statistics.

Tables are included in this section which present data on public health expenditure. The source is the Association of State and Territorial Health Offices.

Data on veterans hospitals comes from the United States Veterans Administration, Annual Report.

GOVERNMENT AND ELECTIONS

Types of local government units and characteristics of the population of voting age are the subject of this section. A summary table is from the 1977 Census of Governments. These include numbers of local governmental units in Florida by county and by type. The number of elected officials is also shown. Other data from this Census appears in the 1979 Abstract. An index of Census tables appearing in previous Abstracts is at the back of this edition.

The Division of Elections in the Florida Department of State provides information on registered voters and numbers of votes cast. This year the data refer to the general election of 1980. Current figures on voting age population are released annually by the Bureau of Economic and Business Research, University of Florida.

Federal civilian employment in Florida comes from the Annual Report of the U.S. Office of Personnel Management.

The Bureau of the Census defines each of the different types of local government units as follows:

A county is an organized local government authorized and designated by a state's constitution or statutes.

A municipality is a political subdivision within which a municipal corporation has been established to provide general local government for a specific population concentrated in a defined area. In Florida they are called cities, towns, and villages and have been established either by special acts of the legislature or by general law.

A school district is an entity providing local public schools. There is an independent school district in each county in Florida and twenty-eight community college districts.

A special district has been established to perform one or more specific functions dealing with natural resources, housing, urban renewal, hospital, fire protection, libraries, or public transit. About one-third of the special districts in Florida have taxing power.

TABLE 21.27. APPORTIONMENT: MEMBERSHIP IN THE UNITED STATES HOUSE OF REPRESENTATIVES IN FLORIDA, 1840 TO 1970, AND ILLUSTRATIVE REAPPORTIONMENT BASED ON 1979 POPULATION ESTIMATES

CENSUS OF--	NUMBER	CENSUS OF--	NUMBER
1840 A/	1	1910	4
1850	1	1930	5
1860	1	1940	6
1870	2	1950	8
1880	2	1960	12
1890	2	1970	15
1900	3	1979 B/	18

A/ ASSIGNED AFTER APPORTIONMENT.
B/ THIS APPORTIONMENT WAS CALCULATED FOR ILLUSTRATIVE PURPOSES ONLY AND IS BASED ON 1979 POPULATION ESTIMATES. THE FIGURES DO PROVIDE A GENERAL INDICATION OF THE IMPACT OF POPULATION CHANGES SINCE 1970. THE POPULATION ESTIMATES ARE SUBJECT TO ERROR AND EVEN SMALL DIFFERENCES BETWEEN 1979 ESTIMATES AND THE 1980 CENSUS COUNTS, WHICH WILL BE THE BASIS FOR THE OFFICIAL APPORTIONMENT FOR THE 1980'S, CAN AFFECT THE DISTRIBUTION OF CONGRESSIONAL SEATS.

COURTS AND LAW ENFORCEMENT

Data on criminal offenses are subject to certain limitations. Many crimes are not reported to law enforcement agencies and hence are not counted in preparing crime statistics. Victims may report crimes to prosecuting authorities rather than to law enforcement agencies. Others think there is no use in reporting crimes because nothing can be done about them. Still other victims may have shared in such offences as illegal sex acts, gambling, or drug usage.

The principal source of data on crimes and criminals in Florida is the annual report of the State Department of Criminal Law Enforcement, Crime in Florida. Other sources include publications of several divisions of the U.S. Department of Justice: Crime in the United States, by the Federal Bureau of Investigation; National Prisoners Statistics Bulletin: Capital Punishment by the Bureau of Justice Statistics, U.S. Department of Justice; and Expenditure and Employment Data for the Criminal Justice System from the same source.

Data on legal services come from the Florida Bar and the Florida Division of Employment Security, Bureau of Research and Analysis.

Prison and prisoner information is made available by the Federal Bureau of Prisons of the U.S. Department of Justice in its Statistical Report and the Florida Department of Corrections, Annual Report.

1/ ACTUAL OFFENSES KNOWN TO LAW ENFORCEMENT OFFICERS, NOT THE NUMBER OF PERSONS WHO COMMITTED THEM OR NUMBER OF INJURIES THEY CAUSED.

2/ INCLUDES MURDER, FORCIBLE RAPE, ROBBERY, AND AGGRAVATED ASSAULT.

3/ INCLUDES BREAKING AND ENTERING (BURGLARY), LARCENY, AND AUTO THEFT.

4/ CLEARANCE OF AN OFFENSE OCCURS WHEN AN OFFENDER IS IDENTIFIED, CHARGED, AND TAKEN INTO CUSTODY, OR OCCASIONALLY WHEN SOME ELEMENT BEYOND LAW ENFORCEMENT CONTROL PRECLUDES FORMAL CHARGES AGAINST THE OFFENDER.

NOTE: DATA ARE AGGREGATES OF OFFENSES REPORTED TO MUNCIPAL, COUNTY, AND STATE LAW ENFORCEMENT AGENCIES AND CAMPUS POLICE DEPARTMENTS.

SOURCE: STATE OF FLORIDA, DEPARTMENT OF LAW ENFORCEMENT, CRIME IN FLORIDA: 1980 ANNUAL REPORT.

GOVERNMENT FINANCE AND EMPLOYMENT

State and local governments are not only important from political and social viewpoints, but their economic impact is considerable.

The U.S. Bureau of the Census publishes a number of individual reports, including State Government Finances, City Government Finances, Public Employment, Finances of Employee-Retirement Systems, Labor-Management Relations in State and Local Governments, and Governmental Finances and Employment. The Bureau of the Census also has published Local Government in Selected Metropolitan Areas and Large Counties, and Environmental Quality Control. Basic data from the 1977 Census of Governments relating to finance and employment will be found in the 1980 Florida Statistical Abstract. An index of tables in previous Abstracts appears at the end of this book. The U.S. Community Services Administration releases Geographic Distribution of Federal Funds (formerly Federal Outlays).

Official records and reports of the Comptroller of the State of Florida form the basic source of information about government finances in Florida and are published in the Annual Report of the Comptroller. Although the official records of the Comptroller are used by the Bureau of the Census in its compilations on state and local government finances, the Bureau of the Census has found it necessary at times to classify and present the government financial statistics in terms of its own system of uniform concepts and categories rather than according to the diverse terminology and structure of individual governments. This procedure explains the differences which may be found between similar data from the two sources.

Other State of Florida sources of data on government finances and employment include the Department of Revenue, Florida Ad Valorem Valuations and Tax Data; the Department of Business Regulation, for data on pari-mutuel wagering and beverage licenses; The Report of the State Treasurer; the Division of Employment Security on employment and payroll; and the Division of Retirement, Annual Report. The publication Growth Patterns in Local Government Expenditures in Florida 1973-77 is a new one this year and comes from the Institute of Food and Agricultural Sciences of the University of Florida. A number of tables this year use as a source Local Government Financial Report put out by the Florida Department of Banking and Finance.

A number of tables in the Health, Education, and Cultural Services Section (20.00) contain data on property valuations, revenue, expenditure, and taxes for education by public agencies.

ECONOMIC INDICATORS AND PRICES

Most of the tables in the Abstract are cross-sectional or "snapshot" portrayals of the situation existing at any one time. Many readers are interested in charting trends over time. This section should help them.

The basic series of economic indicators for Florida is prepared by the Bureau of Research and Analysis of the Division of Employment Security of the Florida Department of Labor and Employment Security and is presented in Table 24.12.

Sales and sales taxes paid is a series that results from the operation of the Department of Revenue of the State of Florida. A source of banking data is the State of Florida, Division of Banking.

Consumer price indexes are the work of the Bureau of Labor Statistics of the U.S. Department of Labor and appear in the Monthly Labor Review, Handbook of Labor Statistics, and in the U.S. Department of Commerce publication Survey of Current Business. This index is based on information reflecting the buying habits of about 80 percent of the U.S. population and represents all urban residents, including professional workers, the self-employed, the poor, the unemployed, and retired persons. Not included are persons living outside urban areas, farm families, persons in military services, and those in institutions. In addition, the Department of Economics of the University of North Florida in cooperation with the Florida Times-Union has developed a consumer price index for Jacksonville. They have graciously allowed the Florida Statistical Abstract to present it in this section, Table 24.66. The Bureau of Labor Statistics issues a quarterly CPI for Miami.

A publication of the U.S. Bureau of Labor Statistics called News presents the estimates of family budgets for Orlando and other cities and the relative weights of items in the consumer price index. It also makes available an index of consumer prices for energy. The budgets are presented in Section 5.00. Price level indexes for the counties of Florida are prepared and released by the state Governor's Office.

The series of producer prices appears in Table 24.70. According to the U.S. Bureau of Labor Statistics, this series measures the average changes in prices received in primary markets of the United States by producers of commodities in all stages of processing. The sample used for calculating the indexes contains nearly 2,800 commodities and about 10,000 quotations selected to represent the movement of prices of all commodities produced in the agriculture, forestry, fishing, mining, manufacturing, gas, electricity, and all public utility sectors. Indexes shown in Table 24.74 for producer prices by stage of processing from 1976 to 1980 have been revised to correct a calculation error.

Data on price trends in construction will be found in Section 11.00, and indexes of prices received by fishermen in Section 10.00.

NOTE: TO ARRIVE AT STATE TOTALS, DATA FOR SMSAS WERE TAKEN FROM REPORTS SUBMITTED BY ALL PLACES WITHIN THESE AREAS. ESTIMATES OF THE DATA FOR NONSMSA PLACES IN FLORIDA AND THE UNITED STATES WERE BASED ON SAMPLE SELECTION OF PERMIT-ISSUING PLACES. THERE WERE IN THE UNITED STATES 13,000 SUCH PLACES PRIOR TO 1973, AND 14,000 FROM 1973 TO 1978. BEGINNING IN 1979 A NATIONAL UNIVERSE OF 16,000 PERMIT-ISSUING PLACES HAS BEEN USED.

(NA) NOT AVAILABLE.

NOTE: THESE SALES WERE REPORTED TO THE DEPARTMENT OF REVENUE FOR THE 4 PERCENT REGULAR SALES TAX, THE 4 PERCENT USE TAX, AND THE 3 PERCENT VEHICLE AND FARM EQUIPMENT SALES TAX FROM JANUARY TO DECEMBER OF EACH YEAR. THE SALES OCCURRED, FOR THE MOST PART, FROM DECEMBER OF THE PREVIOUS YEAR THROUGH NOVEMBER OF THE POSTED YEAR. THESE DATA ARE NOT COMPARABLE WITH RETAIL SALES FIGURES REPORTED BY THE BUREAU OF THE CENSUS OR THOSE ESTIMATED BY THIS BUREAU PRIOR TO 1970 BECAUSE OF DIFFERENCES IN DEFINITIONS OF RETAILERS AND RETAIL SALES. IN JULY 1967, CHANGES WERE MADE IN THE LAW WHICH INCREASED THE NUMBER OF KINDS OF ITEMS SUBJECT TO SALES TAXES.

SOURCE: STATE OF FLORIDA, DEPARTMENT OF REVENUE, SALES TAX TOTALS BY KIND--CALENDAR YEAR ENDING DECEMBER 31, 1980, AND PREVIOUS EDITIONS.

NOTE: THE FLORIDA PRICE LEVEL INDEX IS A SET OF NUMBERS WHICH REFLECTS THE PRICE LEVEL IN EACH COUNTY RELATIVE TO POPULATION-WEIGHTED STATEWIDE AVERAGE (100) FOR A PARTICULAR POINT IN TIME, OCTOBER 1980. IT MEASURES PRICE LEVEL DIFFERENCES FROM PLACE TO PLACE IN CONTRAST TO THE CONSUMER PRICE INDEX PREPARED BY THE U.S. BUREAU OF LABOR STATISTICS, WHICH MEASURES PRICE LEVEL CHANGES FROM MONTH TO MONTH. THE BASIS FOR THESE COMPARISONS IS ONE FIXED STANDARD OF LIVING WHICH REPRESENTS THE CONSUMPTION PATTERNS OF A TYPICAL WAGE EARNER OR CLERICAL WORKER. THE INDEX MEASURES IN EACH COUNTY THE RELATIVE COST OF LIVING BY THIS STANDARD.

QUALITY OF LIFE

The quality of life is a highly abstract concept that cannot be measured directly. However, by defining those factors that determine the quality of life and measuring the corresponding social indicators, comparisons of the quality of life in different places may be made. Furthermore, by updating these measures from time to time, progress or regress in the conditions of living in one area may be computed.

Traditionally, it has been assumed that the only sound indicators of any value were such measures of economic prowess as gross national product or personal income. But in today's highly complex society there are many characteristics of the environment that the affluent can change no more easily than those with fewer financial resources. A list of both economic and noneconomic factors that most people would accept as representing determinants of the quality of life can be classified by such broad categories as community living conditions, personal achievements, and environmental factors. Within these sections specific indicators are grouped into such divisions as health, education, income, employment, welfare, climate, economic conditions, public safety, governmental environment, and the health and cultural environments.

In Table 25.01 indicators were selected to permit the reader to compare the quality of life in Florida with that in other states in the Sunbelt and with other populous states in other sections of the country. In Table 25.02 are indicators of the relative quality of living in one or another of the standard metropolitan statistical areas within the state (SMSAs). See the front of the book for a map and the introduction to Section 1.00 for a discussion of SMSAs.

Those interested in comparing Florida with all fifty states or in determining how the metropolitan areas here fit into the national picture are referred to the following publications: (1) Federal Statistical System and U.S. Bureau of the Census, Social Indicators, III (1980); (2) U.S. Environmental Protection Agency, Washington Environmental Research Center, Quality of Life Indicators in U.S. Metropolitan Areas, 1970; (3) Ben-Chieh Liu, The Quality of Life in the United States, 1970; and (4) Quality of Life Indicators in the U.S. Metropolitan Areas, 1970. Item 1 is obtainable from the U.S. Government Printing Office, item 2 from the source indicated, and items 3 and 4 from the Midwest Research Institute, 425 Volker Boulevard, Kansas City, Missouri 64110.

GUIDE TO SOURCES OF STATISTICS

The Florida Statistical Abstract is an abstract. It presents as much statistical information as possible in tabular form, but it is also a guide book to the sources from which the statistics have been taken. In almost every instance more detail exists in the source than can be included in the Abstract, and sometimes the issuing agency has additional data or perhaps more recent information by the time Abstract reaches the user. Where does the user find the sources used in this abstract? Most of them are as close as the telephone or the nearest library.

State sources. Most of the state publications are available free of charge from the agency which issues the report. Supplies are freqently limited and sometimes requests cannot be honored unless they come from other state agencies. The state has a system of state depository libraries, coordinated by the Division of Library Services, Florida Department of State, R.A. Gray Building, Tallahassee 32304. All state agency publications are supposed to be on file in depository libraries or available for interlibrary loan. The reference departments of most libraries are willing to answer questions about data in these publications if the requests are not too time-consuming. The Florida Division of State Library Services issues a monthly and annual summary of state agency publications called Florida Public Documents.

Depository libraries of the State of Florida include the public libraries of Bay and Broward counties, Cocoa, Jacksonville, Miami Beach, Miami, Ocala, Orlando, St. Petersburg, Tampa, and West Palm Beach. University libraries designated as depositories are those at Florida Atlantic, Florida International, Central Florida, Florida State, Stetson, Jacksonville, Florida (Gainesville), Miami, North Florida, South Florida, and West Florida universities. The library at Miami-Dade Community College and the State Library of Florida in the R.A. Gray Building in Tallahassee also are depositories.

Federal sources. Some federal reports are available without charge from the agency which issues the information, but most federal publications must be purchased from the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, D.C. 20402 (phone 202/783-3238) or from a local Government Printing Office bookstore. Publications purchased from the GPO must be paid for in advance. The Statistical Abstract of the United States is similar in purpose to the Florida Statistical Abstract. Readers who are interested in information about the nation, its regions, and states are referred to it.

The federal government also maintains a system of depository libraries in all 50 states, usually the same libraries as state depositories. The University of Florida is designated as a regional depository library and is required to receive and retain one copy of all depository government publications made available to depository libraries either in printed or microfacsimile form.

Private sources. A number of private agencies and associations issue publications or reports which have been used in this edition of Abstract. Some are copyrighted and have been used with permission. Several have additional information

which can be obtained for a fee. The following is a partial list of agencies and addresses:

U.S. Travel Data Center, 1899 L Street, N.W., Suite 610, Washington, D.C. 20036
Florida Savings and Loan League, P.O. Box 2246, Orlando, Florida 32802
U.S. League of Savings Associations, 111 E. Wacker Drive, Chicago, Illinois 60601
American Forest Institute, 1619 Massachusetts Avenue, N.W., Washington, D.C. 20036
Tax Foundation, Inc., 1875 Connecticut Avenue, N.W., Washington, D.C. 20009
American Gas Association, Department of Statistics, 1515 Wilson Boulevard, Arlington, Virginia 22209
Association of American Railroads, 1920 L Street, N.W., Washington, D.C. 20036
Editor and Publisher, 575 Lexington Avenue, New York, New York 10022
Broadcasting, 1735 DeSales Street, N.W., Washington, D.C. 20036
Health Insurance Institute, 1850 K Street, N.W., Washington, D.C. 20006
Insurance Information Institute, 110 William Street, New York, New York 10038
American Council of Life Insurance, 1850 K Street, N.W., Washington, D.C. 20006
Federal Deposit Insurance Corporation, 550 17th Street N.W., Washington, D.C. 20429

Computer tapes. All tables in the Abstract were prepared by using a computer and/or communicating word processing equipment. The data are available for direct access. Information can be obtained from the Bureau of Economic and Business Research.

The Florida information service of the University of Florida Library in Gainesville maintains an extensive collection of information of and about Florida in books, in files, and on computer tapes. All the data from the population, housing, and economic censuses can be accessed from their computer tapes.

Bureau publications. The Bureau of Economic and Business Research can supply a variety of detailed information about Florida.

Population estimates for the state and its minor civil districts are made each year and published in Florida Estimates of Population. In 1981 a Summary of 1980 Census Results for the state, counties and municipalities of Florida has been issued in place of the estimates. Four times a year Population Studies is issued which provides such information as forecasts, age, race, and sex components.

Building Permit Activity is a monthly, quarterly, and annual compilation of permits issued by municipal and county issuing agencies throughout the state.

Gross and taxable sales data by type of business and by county are supplied to the Bureau by the Department of Revenue of the State of Florida. These data can be supplied to interested persons.

The Bureau also publishes The Florida Outlook (a quarterly forecast of the Florida economy), Business and Economic Dimensions, Economic Leaflets, and Florida Economic Indicators.

In cooperation with the Center for Gerontological Studies at the University of Florida, the Bureau prepares a supplemental abstract on Older People in Florida. The 1980 edition became available in early 1981.

For prices and more information about these publications and services contact the Bureau of Economic and Business Research of the University of Florida, Gainesville, FL 32611.

INDEX OF CENSUS TABLES

THE U.S. BUREAU OF THE CENSUS CONDUCTS VARIOUS CENSUSES AT REGULAR INTERVALS. THIS INDEX LISTS TABLES FROM PREVIOUS FLORIDA STATISTICAL ABSTRACTS WHICH INCLUDE DATA FROM THESE CENSUSES. ALL TABLES WITH DATA FROM THE CENSUS OF POPULATION AND HOUSING APPEARING IN PREVIOUS ABSTRACTS ARE INCLUDED HERE. FOR OTHER CENSUSES, ONLY THE ONE OR TWO MOST RECENT CENSUSES ARE INDEXED. NO TABLES IN THE 1981 EDITION OF ABSTRACT ARE INCLUDED HERE.
